Italian brand GLOBETANK, for tanks and cisterns, was born from the desire to create high quality products, adaptable to the **circular economy** model, versatile, long-lasting and able to meet the most varied needs and high expectations; from individuals to original equipment companies, with design and functional predisposition simple and immediate.

QUALITY AND TECHNOLOGY

➔ The excellence of the products is guaranteed by European certifications and the strict quality controls adopted by the owner company, **Rotoglobe**; a company with thirty years of know-how in the design and production of products obtained with **rotational molding** technology with air cooling, an ideal production technique for hollow plastic products, with high mechanical resistance, seamless and **low environmental impact**.

PRODUCTS FEATURES

VERSATILE TO ALL NEEDS

➔ GlobeTank products comply with the containment of **water: drinkable, clear, grey, black** and **chemical** detergents. Compared to other technologies the tanks and cisterns have a **lower weight** and are **easily transportable** thanks to the ergonomics of the applied design. These features combined with the provision of already **threaded fittings** for assembly make GlobeTank the reference point for simple, flexible and responsible storage of liquids.

LONG-LASTING

➔ All products are designed to have high **resistance to aging**; the quality of the production chain and the absence of welds, tensioning areas and critical points, make them suitable for operation in any climatic condition (between **- 30° C** and **+ 60° C**), while compliance with contact with chemical agents, **anti-algae** proliferation systems and **UV stabilization** guarantee their conservation and maintenance over time.

RESPECTFUL OF HEALTH AND THE PLANET

➔ The raw material used to make all products is the first choice **HD virgin polyethylene**, of certified and guaranteed European origin; a non-toxic material, which does not require painting, thanks to its mass pigmentation and which makes the products safe for humans, as they are **"food approved"** and **"drinkable compliant"** (WRAS, KTW – W270 – 2002/72/EC) and friends of nature, as they are 100% **recyclable, regenerable** and **reusable**.

CUSTOMIZABLE AND INTEGRABLE

➔ All GlobeTank product lines allow additional customizations to their design versatility as for example the choice for Gea and Pluvio of 2 lids: "Ghibli" model with **screw cap** and "hinged" lid model with **bayonet cap**. All GlobeTank lines can be integrated with options, such as **fittings** and **taps** and can be customized with different colors: standard and premium. In addition, we offer 2D and 3D technical drawings of our products, upon request.

Discover the product lines and find the one that best suits your needs.

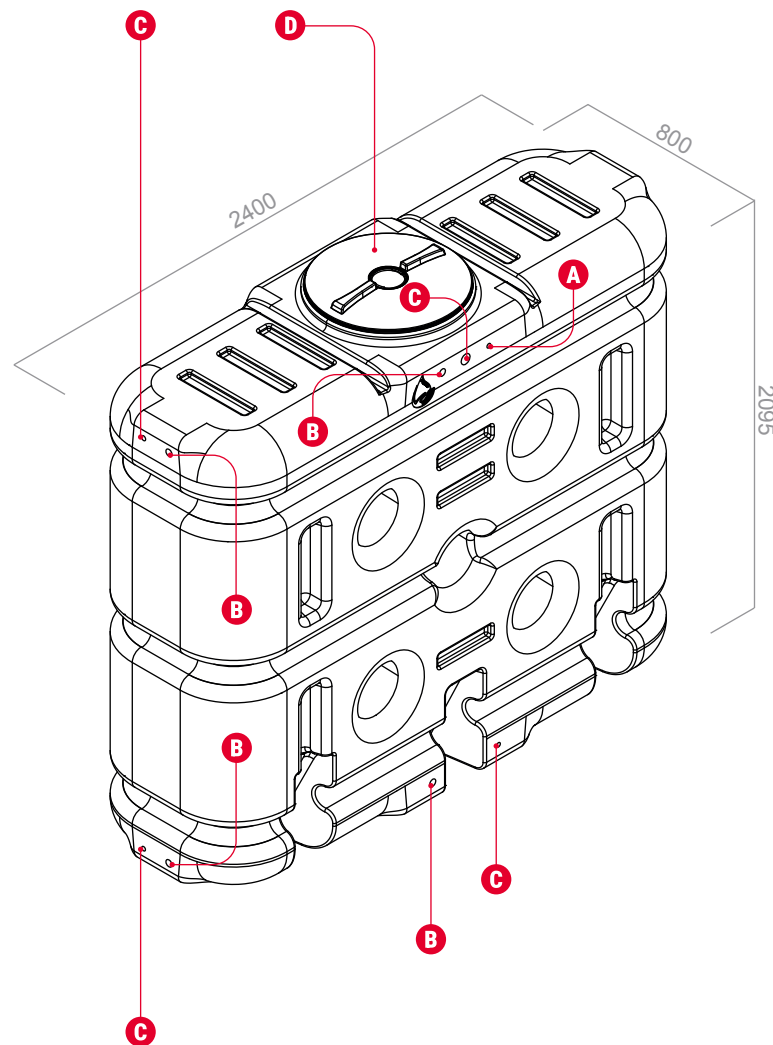

PLUVIO

Line of tanks designed for the storage and the collection of rainwater and for its reuse, contributing to water saving and usable in multiple liquid storages.

The Pluvio line is available with **screw cap** or with flipping system with **bayonet cap** and optional basket filter.

Make the most of natural resources while preserving our "blue gold". With this option, **collecting rainwater** to keep your tank always full will be much easier and more effective, thanks to the design and size that increase the rainwater collection area to 2.4 sqm. Catch rain is universal, for any cistern, for GEA and PLUVIO product line too.

Measurements expressed in millimeters

Contemporary design is increasingly focused on space optimisation and ergonomic reinterpretation of housings. Each component must evolve in line with these needs. From this analysis comes our line of tanks, vertically designed.

VERTICALSMART

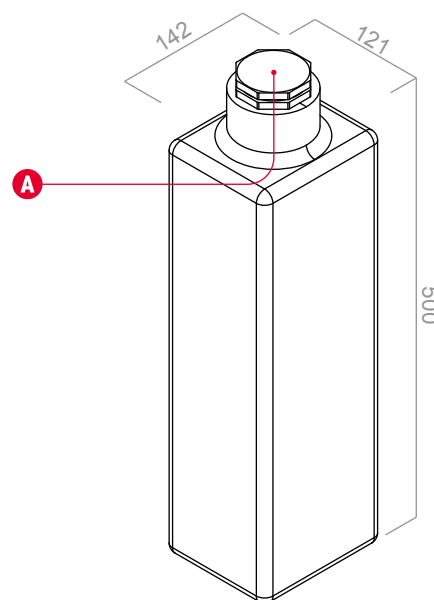

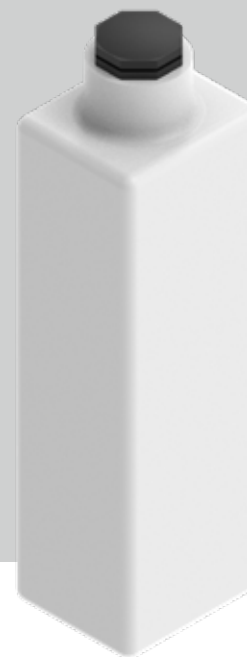

Useful tanks for limited spaces ,
for simple use eased by the different
connection predispositions, also in
vertical version.
